

MARITIME COLLECTION – SNAIL SALT

Shell pink

Design: Ted Muehling, 2000

length 7 cm · product no. 10.899

Even though mankind has only been able to identify a fraction of our planet's sea dwellers, this diversity of species already offers a plethora of riches. The US designer Ted Muehling used this richness as his inspiration when creating an entire collection of shells, vases and lanterns in the form of sea life. Part of the collection is this small, snail-shaped salt cellar. Its circles of unglazed biscuit porcelain end in an opening that is softly glazed in a shell pink.
